MODULATORS

## SIMPLICITY AND CONVENIENCE

The basic principals behind TERK's line of modulators and switches are simplicity and convenience. Regardless of how old or new your TV is, our modulators and switches simplify your home entertainment system while enabling its expansion. Modulators allow you to connect one or more A/V components (such as DVD players and game systems) to your TV. They take the component's low frequency signal and convert it to a high frequency for viewing on VHF channel 3 or 4. Switches eliminate the disconnecting and reconnecting of multiple A/V components to a single TV making home entertainment options easier to control. TERK also provides a solution for volume control, managing volume inconsistency for both programming and commercials automatically.

## MODULATORS

TERK's full-line of RF modulators provide solutions to common A/V installation problems. RF modulators convert an incoming signal from an A/V component (like a DVD player) to a high frequency for viewing on VHF channel 3 or 4. This allows you to quickly connect your equipment to old TVs without RCA jacks or to a new TV with no available RCA jack.

**VS4 Mod+ :: 4 Input Modulator/Video Switch**

- Easily connects up to four A/V components to a single TV input
- Automatically switches between antenna/cable and video sources
- Learning IR Remote Function: Use your existing remote control to select A/V source
- S-Video jacks for crystal clear picture quality
- Selectable to channel 3 or 4 output
- Includes a VHF antenna/cable input

**Mod41 ::** Four Input RF Modulator/Video Switch

- Converts up to four A/V source inputs (DVD, PVR, VCR, camcorders, video game systems, etc.) to VHF for viewing on any TV
- Switchable between video sources and cable or antenna
- Selectable to channel 3 or 4 output
- Front panel instant push button switching

**Mod34 ::** Set-top RF Modulator

- Automatically switches between antenna/cable and video source
- Converts source video to VHF for viewing on any TV.
- Selectable to channel 3 or 4 output
- Eliminates the need for extra monitors
- Separate VHF antenna/cable input simplifies installation and switching of components

## VIDEO SWITCHES

The TERK VS-4 allows you to connect DVD players, VCRs and game systems to a TV so you can switch between them without having to disconnect and reconnect wires. Its multiple RCA jacks let you easily install up to 4 A/V components.

**MINI ::** Mini RF Modulator

- Automatically switches between antenna/cable and video source
- Converts source video to VHF for viewing on any TV.
- Selectable to channel 3 or 4 output
- Separate VHF antenna/cable input simplifies installation and switching of components

**VS4 ::** Video Switch

- Includes S-video switching on all inputs
- Constructed using high-quality components for maximum performance and reliability
- Includes non-skid feet to assure the unit stays in place when in use
- Easy set-up and installation

## VOLUME REGULATOR

TERK's Volume Regulator is the perfect solution for a problem many of us share, inconsistent volume levels on our A/V equipment. The TERK VR-1 is a simple to install device which automatically recognizes inconsistent volume levels from A/V components and adjusts them within .002 seconds, giving you easy to understand dialog on movies and consistent volume even when commercials come on.

VR-1 :: TV Volume Regulator

- Advanced Digital Signal Processing for automatic audio adjustment
- Noise Reduction technology reduces 'hiss' present in audio
- Dual-band automatic gain control adjusts bass and treble signals separately for improved dialog
- High quality components: low loss for excellent sound performance
- Responds in .002 seconds to ensure balance of loud noises
- Compatible with any A/V device using RCA-type connectors
- Once installed, no further action is needed

TERK Technologies 63 Mall Drive Commack, NY 11725
